

TENNECBD DIVINE BOVINE PET

CBD Specially Formulated for Our Furry Friends.

TenneCBD Pet Plus is designed as a broad-spectrum tincture specifically formulated to give your dog, cat or other mammalian family member an adequate dose of relief. Our uniquely blended formula combines pharmaceutical-grade ingredients with all natural beef pan drippings and our signature distilled MCT for fast absorption and an irresistible taste.

By reducing the amount of THC present, without compromising the benefits of a natural whole-plant extract, we have taken into consideration that many animals are acutely sensitive to THC and present to you the first line of products designed with this in mind.

Dosage can be mixed with food if consumed immediately, otherwise administer orally twice a day and as needed.

Common Uses:

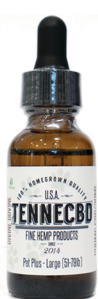

- Cancer Preventative & Treatment
- Easing Joint and Hip Pain
- Reducing Inflammation
- Helping Heal Broken or Bruised Bones
- People have successfully used CBD for the prevention of and use during seizures.

"I am an athlete and recently used TenneCBD Black after I was hit by a car, fractured my wrist, and tore ligaments in my hand. I was able to avoid taking any opiate based pain medication as long as I kept taking regular doses of TenneCBD Black...but I could also pass an Olympic level drug test while still taking this product."
~Warren A.

"I have been in chronic pain for two years. I have been to the best neurologists and neurosurgeons in NYC. I have been on medication that has not helped yet. I have ordered so many CBD oils, creams and chewing gum. I felt nothing. I spoke to my dear friend Rique and he told me about the TENNECBD he has been using and selling. I ordered it and the first time I took it the pain was gone. I called him to see if this could be possible. He said, yes. I have been doing so well for about a month now. I could not be happier. Thank you TENNECBD."
~ Donna R.

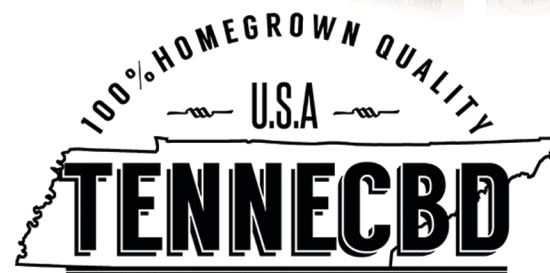

"FYI - I was taking about 6 Advil a day for headaches and have been using the black product. Haven't had to take one!"
~Amber C.

I tried many CBD oils, but none of them affected me at all. I'd finally given up hope. Then I tried TenneCBD oil! I experienced immediate relief from neuropathic pain, body pain from fibromyalgia, even my energy increased. I'm hooked for life on TenneCBD oil! Try it if you're serious about helping yourself!
~Caroline R

"Personally I have seen major benefits with my joint pain and a reduction in inflammation and I am managing my sugar and my insulin every two or three hours - I do one or two drops under my tongue and it really helps with sugar cravings and I have noticed, as have others, a side benefit of weight loss. I apply it topically where needed, I even add a drop to my skin creams and smoothie!"

Please contact me with any questions you might have - I would love to share the benefits of these incredible all natural products.

All The Best,
~Rique

FINE HEMP PRODUCTS

— SINCE —
2014

OWNED AND MANUFACTURED BY LABCANNA EXCLUSIVELY IN FRANKLIN, TN WITH ONLY THE FINEST ORGANIC INGREDIENTS AVAILABLE, INCLUDING ALWAYS CONSISTENT PURE CBD ISOLATE.

CBD OIL FAQ'S

1. WHAT IS CBD OIL?

CBD, or Cannabidiol, is one of over 110 natural cannabinoids and is a non-psychoactive component of the Hemp or Cannabis plant. It possesses many of the healing properties without the "high" that is delivered by THC (Tetrahydrocannabinol).

2. HOW IS THIS LEGAL?

On Feb. 7th 2014 Sec.7606 of The Farm Bill was signed into law allowing the cultivation of hemp with less than 0.3% THC by state departments of agriculture, universities and business entities. The 108th General Assembly then enacted Public Chapter 916 removing hemp from the definition of marijuana in the criminal code and Tennessee began crafting its program for the state. On May 11th 2017 Governor Bill Haslam signed HB1164, which further modified the definition of Industrial hemp to include products made from the plant for ingestion or topical use. Keep in mind that just because these products are legal in Tennessee and produced within a federally legal program, there may be local laws affecting your ability to lawfully have these products. We encourage you to buy at your own risk after looking into the local laws that affect you.

3. WHAT ARE THE BENEFITS OF CBD OIL?

Current studies have shown that CBD has powerful anti-inflammatory, anti-anxiety, anti-depressant qualities. It is also used successfully as a seizure treatment, cancer fighter and tumor preventative, sleep aid, neuroprotectant and cognitive enhancer. CBD also supports healthy heart function, vascular health and gastrointestinal health to name just a few. There is an extraordinarily vast body of scientific research on the broad therapeutic uses of cannabis and particularly of CBD and THC. More evidence exists than can be found on some of the most widely used therapies of conventional medicine.

4. WILL CBD OIL MAKE ME FAIL A DRUG TEST?

The short answer is **No** if you are using the Black Formula which is the pure CBD isolate and **Yes** if you are using the full spectrum Green Formula, which only has trace elements of THC that still can be detected.

5. HOW IS CBD OIL DERIVED FROM THE PLANT?

LabCanna uses a closed loop Supercritical CO2 extraction process that creates phase changes in carbon dioxide utilizing very cold temperatures and high pressure. In liquid form, the CO2 acts as a solvent, removing the desired components from the plant. Next, a winterization process removes the fats and lipids and all residual

6. IS CBD OIL SAFE?

YES! Not only is it safe, it can be taken by kids and animals. All mammals have an endocannabinoid system (ECS) that is a group of endogenous cannabinoid receptors located in the mammalian brain and throughout the central and peripheral nervous systems. Our bodies are designed with 2 types of receptors for cannabinoids like CBD. The American Epilepsy Society's lead Doctor says, "CBD appears to be an effective, sometimes extremely effective, treatment that is safe and well-tolerated overall."

7. CAN I OVERDOSE?

You cannot overdose on CBD, but only small amounts are needed to experience the benefits.

8. SUGGESTED DOSAGE

5 ML (Travel Size) 1 full dropper = .05 ML
30 ML (Full Size) 1/2 half dropper = .05 ML
Put it underneath your tongue in the morning and in the evening preferably 9 hours apart and I recommend letting it dissolve for 15 to 30 seconds and think happy thoughts and or visualize well-being :)
You can also use a few drops when needed every 2-3 hours. It can also be used topically.

DISCLAIMERS

No statement on this web site or in this brochure has been evaluated by the Food and Drug Administration (FDA). Furthermore, none of the statements in this web site or in this brochure should be construed as dispensing medical advice or making claims regarding the cure of diseases. LabCanna products sold by Rique Collection are not intended to diagnose, treat, cure or prevent any disease. You should consult a licensed health care professional before starting any dietary supplement, especially if you are pregnant or have any pre-existing injuries or medical conditions.
Green Plus 3000: There is a good chance because more concentrated ingredients that tests specifically targeting THC may possibly test positive.
